

Main Ideas of Project

Must have (required for success)	Should have (Very important for success)	Could have (Given time could be added)	Won't have (out of scope for the project)
View / Buy / Sell / Trade stocks Accounts for data saving AI summary of trading history Does NOT interact with actual Stocks, crypto, or real currencies	Realistic market times Historical market data	Minigames based on historical stocks Leaderboard system for most profitable	Live stock data (depends on API used)
